

CSR Policy

Emaar MGF Land Limited

1. Company Philosophy

Emaar MGF believes that it is imperative for an organization to give back a humble part of what it takes from the society. We continuously strive to be an entity that is socially committed by bringing together all our existing processes under the ambit of Corporate Social Responsibility through proactive initiatives.

Through our core business activities, Emaar MGF is committed to providing high performance buildings in accordance with LEED India Green Building rating system certified by IGBC (India Green Building Council).

We value employee volunteering and participation as key elements of our CSR vision. We would contribute to the solution of social issues and pursue the realization of a prosperous society. We would work towards minimizing environmental effects and utilizing resources towards the development of a sustainable society that is in harmony with the environment.

2. CSR in real estate construction & development

Real estate construction & development is a very local business. In the first place, it takes place in localities and locations, with 'location, location, location' being the foremost mantra of what gives value to property. However, there are no 'new locations' - only areas that have not been developed as yet. These areas are usually already inhabited.

It is a logical but often overlooked fact that real estate development does indeed benefit the original dwellers in an area in many ways:

- It provides immediate and future employment to locals in an area. Shops and other commercial establishments crop up around new residential buildings, and these are invariably run by locals.
- The infrastructure improves, raising property values and benefiting the original land and property owners of the area.
- Doctors and health care facilities arrive.
- The area is connected to municipal water and electricity supply.
- These factors have a direct bearing on the quality of life of the local inhabitants.

These are direct benefits, but of course they do not originate from a developer's sense of social responsibility. When CSR does occur in context with actual real estate development, it must essentially be directed at those who contribute to the actual process of development.

This is a maxim that Emaar MGF Land Limited believes in, very firmly.
